

Resource Manual for the State of Wyoming – COMING SOON

WDOC has recently partnered with WyoCARE (Wyoming Chemical Abuse Research Education) and have agreed to a working relationship with WyoCARE to create a statewide resource manual that will provide WDOC staff and offenders the most current information on community resources focusing on reentry services.

This is a joint effort between WDOC and WyoCARE to develop and maintain this web-based resource manual.

WyoCARE is funded by grants from the Wyoming Department of Health, Mental Health & Substance Abuse Services Division and the Wyoming Attorney General's Office, Division of Victim Services. WyoCARE, the Wyoming Chemical Abuse Research and Violence Prevention Education Program is a prevention, education and treatment oriented program coordinated through the Counselor Education Department at the University of Wyoming.

Until the manual is available, if you have questions about resources in your area, you can contact WyoCARE at **1.800.895.1121**

You can also access their webpage www.wyocare.org. In addition, WyoCARE offers a clearinghouse of free materials to order for your use working with inmates and offenders. Check out their inventory tab to find materials.
